

Ad alta densità di potenza, realizzati con riscaldatori microtubolari a sezione rettangolare, con (REPT) e senza (REPN) termocoppia incorporata, spiralati. Se montati sugli ugelli vengono inseriti in un tubo di acciaio inox. Sono disponibili nei modelli standard, nelle misure e potenze indicate in tabella e si possono costruire anche su specifica richiesta.

High power density heaters, obtained by coiling rectangular section microtubular heaters, with (REPT) or without (REPN) thermocouple built in J type.

If assembled on nozzles, such elements have previously been inserted into a stainless steel pipe.

The standard model is available in the sizes and wattages shown in the chart here below. Other sizes can be manufactured upon customer demand.
